

STEREO HEADSET WITH MICROPHONE

Dialog 812 offers a NCAT2 (Noise Canceling Amplification Technology) filtering out unwanted background noise to improve the audio input, which certifies this headset for speech recognition. Use of Voice-over IP technology is exploding. This year the new Microsoft Windows & Office are voice enabled.

With this headset, you will take advantage of the new communication tools.

System frequency response Headset: 20-20,000 Hz -

Microphone: 100-16,000Hz
