IV. Hardware Installation

A. Mobile Rack components:

1. Receiving Frame.
2. Inner Case.

* Receiving frame

- Key-Lock Type Auto-close door for dust resistance

- Slide Switch Type Auto-close door for dust resistance

- * Inner Case

3 Installing the Mobile Rack receiving Frame.

Turn OFF the power to your computer and any other connected peripheral devices. Follow the precautions for static electricity discharge. Discharge any static electricity build up in your body by touching a grounded metal surface such as the computer case, if plugged in. During installation procedures, avoid any contact with internal parts. Unplug the power cord from the back of the computer. Remove the computer's cover.

4. Remove the computer's front cover plate the 5.25" drive bay before you install you install your Mobile rack into.

5. Lift the handle and pull the Inner Case out from the Receiving Frame.
 6. Slide the Receiving Frame into the 5.25" drive bay from the front to the back. Make sure the Receiving Frame mounting holes align the drive bay's mounting holes. Secure with the supplied mounting screws (two on each side).

7. Find a large 4-pin white terminal on the power supply of the computer, and insert it into the male 4-pin connector at the back of the Receiving Frame.
 8. Connect the I/O cable (IDE cable or Ultra Wide SCSI cable), between the mobile rack and your system.
 9. Replace the computer's cover and reconnect the power and other external cabling.

C. Mounting a Hard Drive in the Inner Case:

Proceed with the following steps to install a 3.5" Hard Drive in the Mobile Rack Inner Case:

1. Slide the Inner Case cover out of the Inner Case base.
2. If you plan to install a drive that features removable media such as Zip, TR-4 tape, MO/LS-120 drive, or ATA Flash memory reader, carefully punch out the decoration of the front panel.
3. Inside the Inner Case, you will find a plastic bag, one white-4-pin Terminal, and one 80pin ATA cable.
- If you are installing a new Hard Drive into the Mobile Rack, you need to configure the drive before you install it.
4. Plug the 4-pin power connector into the appropriate port at the rear of the Hard Drive..
5. Plug the 80pin ATA cable into the appropriate port at the rear of the Hard Drive.
6. Carefully position the Hard Drive inside the Inner Case.
7. Secure the Hard Drive with screws from side mounting holes
8. Slide the Inner Case cover back onto the Inner Case base.
8. Push the Inner Case back into the Receiving Frame and turn the key to left to lock the inner case

V. Using the Mobile Rack

Your computer must be Power OFF when the Hard Drive is inserted or removed.

Once installed, the removable hard Drive can be used as any other Hard Drive.

a. To insert the Mobile Rack Inner Case:

1. Make sure the computer is OFF.
2. Insert the Mobile Rack Inner Case(with Hard Drive installed)into the installed Mobile Rack Receiving Frame and push firmly until the Hard Drive is seated.
3. For slide switch models, slide the switch left to lock. For key-lock models, insert the key and turn left to lock.
4. Turn your computer ON. The LED of the Mobile Rack should light after a slight delay. The installed Mobile Rack is ready to use.

b. To remove the Mobile Rack Inner Case.

1. Turn your computer OFF.
2. For Slide switch models, insert the key and turn right to unlock.
3. Gently pull on the Mobile Rack handle to slide the Inner Case out.

c. Lock the Mobile Rack

- a. For key-lock models, insert the key and turn left to lock.
- b. For slide switch models, slide the switch left to lock.

d. Unlock the Mobile Rack
